### **DETAILED ACTION**

Applicants' arguments, filed 3/29/10, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

#### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

**Claims 30, 31, 36, and 41** stand rejected under 35 U.S.C. 103(a) as being unpatentable over Fung et al (US 6,326,201).

Applicants assert Fung et al is directed to treating the pancreas and etazolate is cited among a list of potential cAMP agonists with no description of any result or activity of the compound. Applicants assert the present invention is based on the unexpected findings that etazolate can directly protect retinal integrity via neuroprotective mechanisms.

Examiner disagrees. First, Fung et al is directed to the treatment of diabetes, albeit via regeneration of the pancreas. Where diabetic retinopathy is disclosed in Fung et al to be a complication of diabetes, it would be obvious to treat a diabetic patient with diabetic retinopathy by treating the underlying disorder in order to reduce the resulting complication, i.e. diabetic retinopathy.

Second, while Applicants may have recognized a new mechanism whereby treatment is asserted to have a direct effect, it does not negate the obviousness to administer the active agent to the patient population which includes diabetic patients with diabetic retinopathy. In other words, recognition of another pathway whereby treatment occurs does not overcome an obviousness rejection where another pathway was known or obvious for the same treatment.

### ***Allowable Subject Matter***

**Claim 33** stands objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims for the reasons of record.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1612

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
